

ClassBuddy™ 32

Technical Specification Sheet

Introduction

The ClassBuddy™ offers an unrivalled and cost effective solution to store, charge and even update your devices. Devices are all charged using their own AC adapters which are kept neat and tidy with a simple and effective cable management system. All devices are charged simultaneously in the fastest possible time.

Devices

	No. of devices	Per Shelf
ClassBuddy 32	32	1

Charging

The ClassBuddy™'s ultra-safe power management provides safe simultaneous charging of all devices with quick and easy access. The power management system incorporates three key areas of protection:

1. Soft-start
2. Surge Protection
3. Residual Voltage Protection

These provide the highest level of protection for the user, your equipment and electrical circuits.

Each trolley is naturally ventilated, allowing air to flow through ventilation holes in the base and shelves, and out through the top rear apertures. When using the data transfer option a temperature controlled fan is added to ensure optimum charging temperature.

Security

Security is provided through the cabinet's construction, piano style hinges and locking mechanisms. There is a rear service door with unique keys for technical staff access only.

Colours

The ClassBuddy™ is available in blue as standard, along with four special order colours (black, red, yellow or green).

Lifetime Parts & Labour Warranty

One year on-site, remainder of warranty return to base

Additional Options

Data Transfer

Add data transfer to your trolley to enable updates to your devices whilst charging in the trolley.

Locking

The ClassBuddy™ can be secured with a range of keyed or keyless locks to suit your requirements.

Docking Station

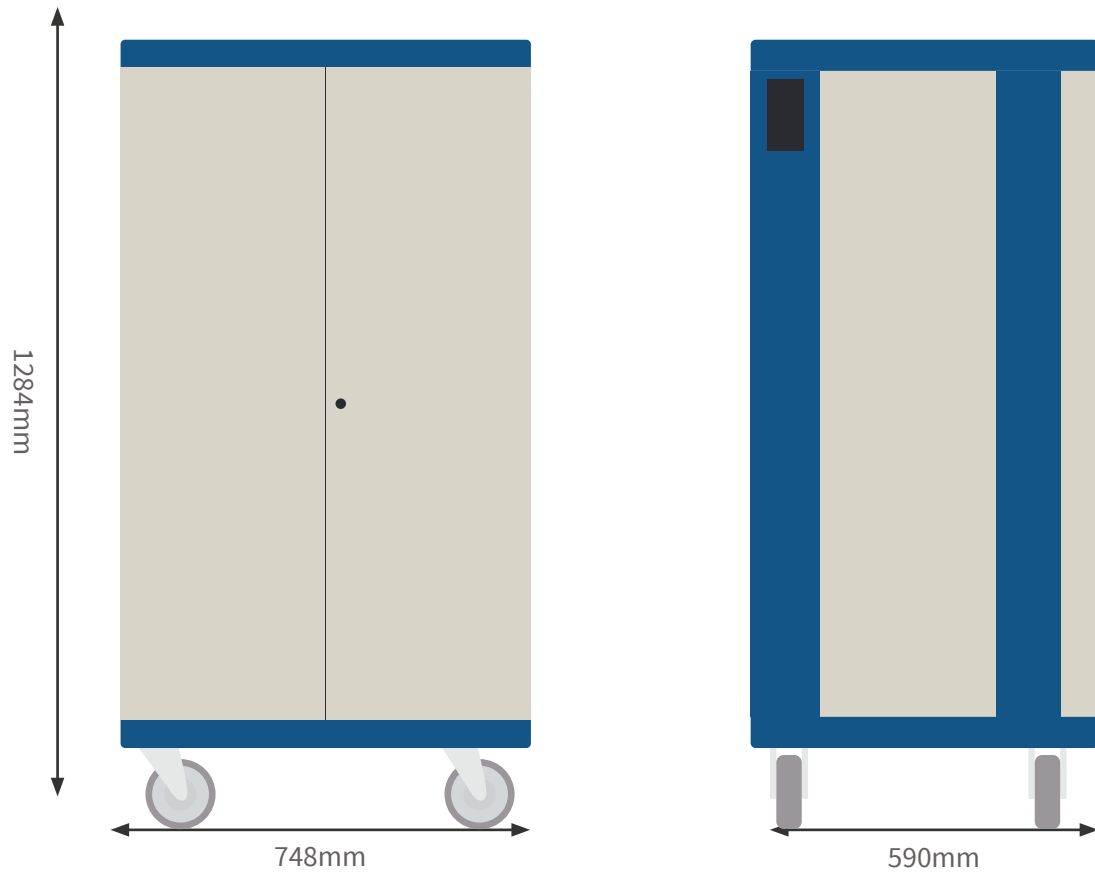

For additional security add a docking station to dock your trolley to a wall

Timer

Add a timer to set your trolley to charging during times that are convenient for you

ClassBuddy™ 32
